REMINDERS FOR SENDING DISTRICTS
When a Student leaves...

1 Transfer Pertinent Information

Promote the timely transfer of pertinent school records (including health information, such as health screenings and health problems that may interrupt a student's education) when children move from one school to another, whether or not the move occurs during the regular school year.

Send parents with transfer packets for each of their migratory children, to deliver to the receiving district staff.

Notify "receiving" school districts about migratory families who have moved to those districts by sending an MSIX move notification.

2 Communicate with Parents

Because migratory families may leave the district at any time, host regularly scheduled informational parent events to ensure parents are aware of how they can assist in the transfer of student information. The recommendation is that these meetings are offered monthly, if possible.

Invite all your migratory families to a "Send Off" event at the end of the school year. Use the event to recognize your families who travel over the summer in search of migrant work.

3 Provide Support for Secondary Students

Implement a dropout prevention and recovery program, and provide support for migratory children who have dropped out.

Develop secondary credit accrual and academic credit exchange programs, to include partial credits earned.

4 Utilize TMIP

Submit a TMIP Referral for all migratory children who withdraw prior to the end of the school year.

Support the efforts of TMIP in administering the Texas state-mandated assessment in states that receive Texas migratory students.
