Monthly Migrant PAC Meetings

Migrant Education Programs may also establish monthly meetings with the PAC and present various educational topics from different departments. Due to the changes in state curriculum and other areas in education, we must keep our migrant parents informed of the academic skills that students are expected to master in the educational school system.

- The Migrant Department may also set up monthly meetings with the PAC to present academic strategies in different subject areas, in addition to the quarterly meetings involving PAC responsibilities.
- The Migrant Director involves different academic departments to present different academic topics and activities in their area of expertise. Based on district-wide data, different strategies and focuses are covered in order to provide the opportunity for student success in every academic area of study.
- In addition to the academic strategies, the Migrant PAC is introduced to all the State and local adopted programs for migrant students, as well as any new anticipated programs made available the following year.
